

ABOUT US

Paramount Management is proud to be a part of the continued growth of Halifax Regional Municipality (HRM) for over 50 years, managing high-quality rental properties that our residents are proud to live and work in.

Paramount Management (Paramount), a division of the Lawen Group, is a privately held, family owned full-service property management firm located in Halifax, Nova Scotia. Paramount specializes in managing apartments and mixed-use residential units in the most sought-after neighbourhoods of Halifax and Dartmouth. The firm's growing portfolio includes over 1,200 residential units and 300,000 square feet of commercial retail and office space.

Paramount works in unison with the Lawen Group's development division Dixel, managing every stage of a project from preliminary designs to the final building commissioning and occupancy.

This integrated strategy provides an immediate feedback loop between development and management, ensuring current market needs are met while remaining on the cutting-edge of emerging multi-residential services.

To continue delivering its residents with superior service, the firm's online platform was created to simplify every aspect of the rental process. Current tenants have direct access to exclusive perks, easy online payments, and can submit inquiries with the click of a button. Prospective tenants can search for apartment and commercial listings in real-time and submit online applications with Paramount's rental search engine 444rent.com.

Attention to detail is never compromised, earning Paramount the highest resident satisfaction in the municipality. Online or in person, Paramount provides its residents with personalized attention, high-quality rental spaces, and ongoing management support.

GET MOVING

MOVING CHECKLIST

FOUR WEEKS BEFORE

- Visit Canada Post to forward your mail
- Contact your bank, credit card company, vehicle insurance and subscriptions to notify of new address
Contact power and cable companies to have your service transferred to your new address
